

MikroTik RouterBOARD

New Products and Roadmap

April 2008

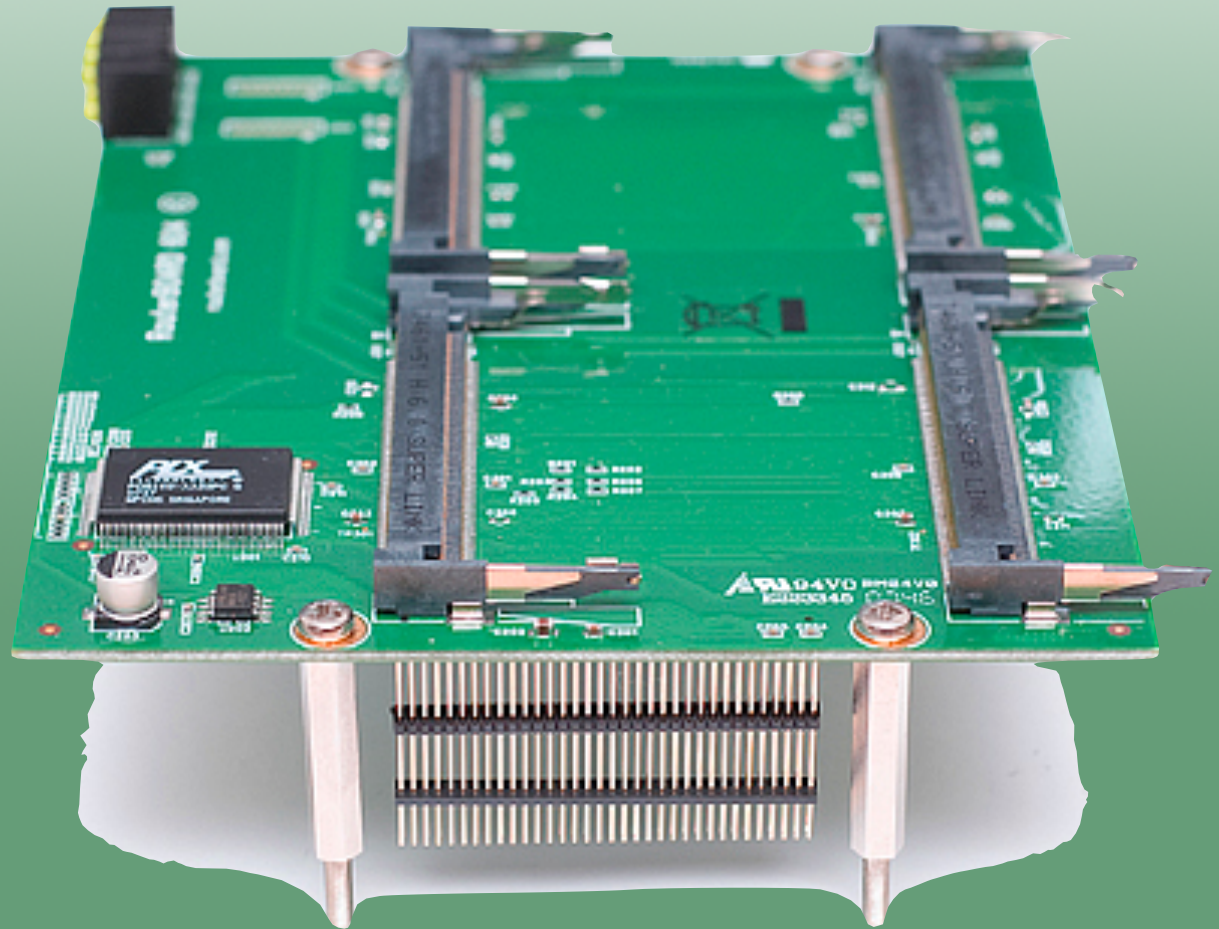

RB600

- Base Station / High Speed AP
- 400MHz PowerPC network CPU
- **3-4x faster** than RB500
- 3x gigabit ethernet ports
- 4x miniPCI
- Daughterboard compatible with RB500
- Up to 1020Mbps throughput

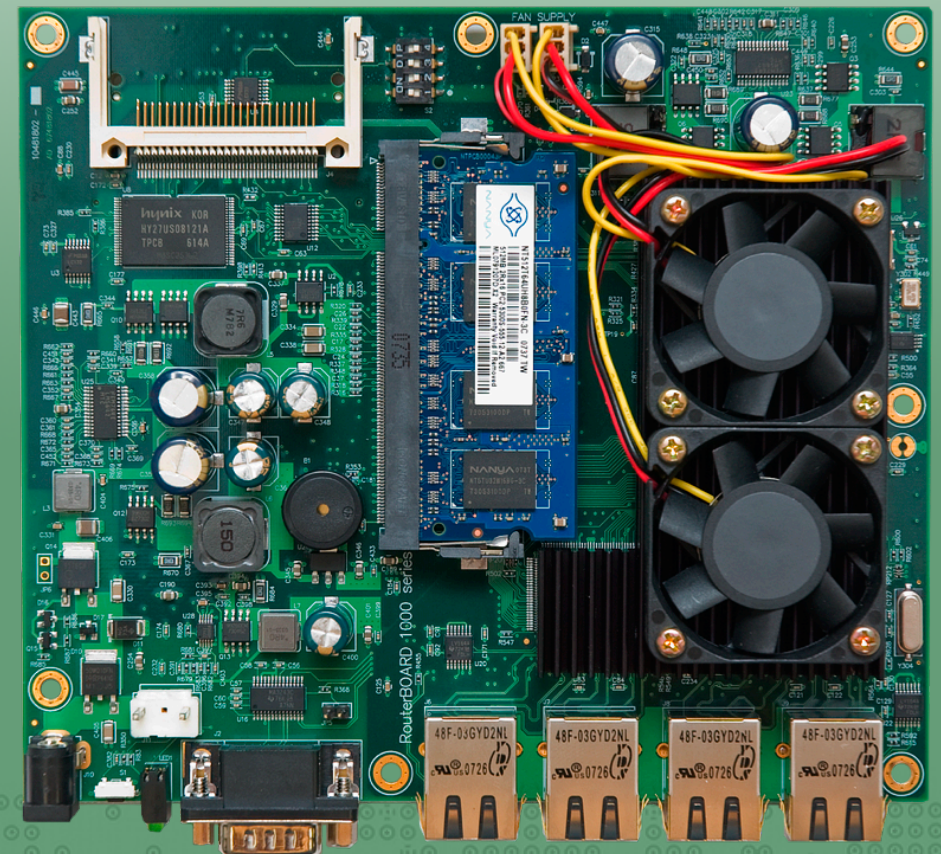

RB/604

- Add on for RB600 and RB500 series devices
- 4 miniPCI slots to your device

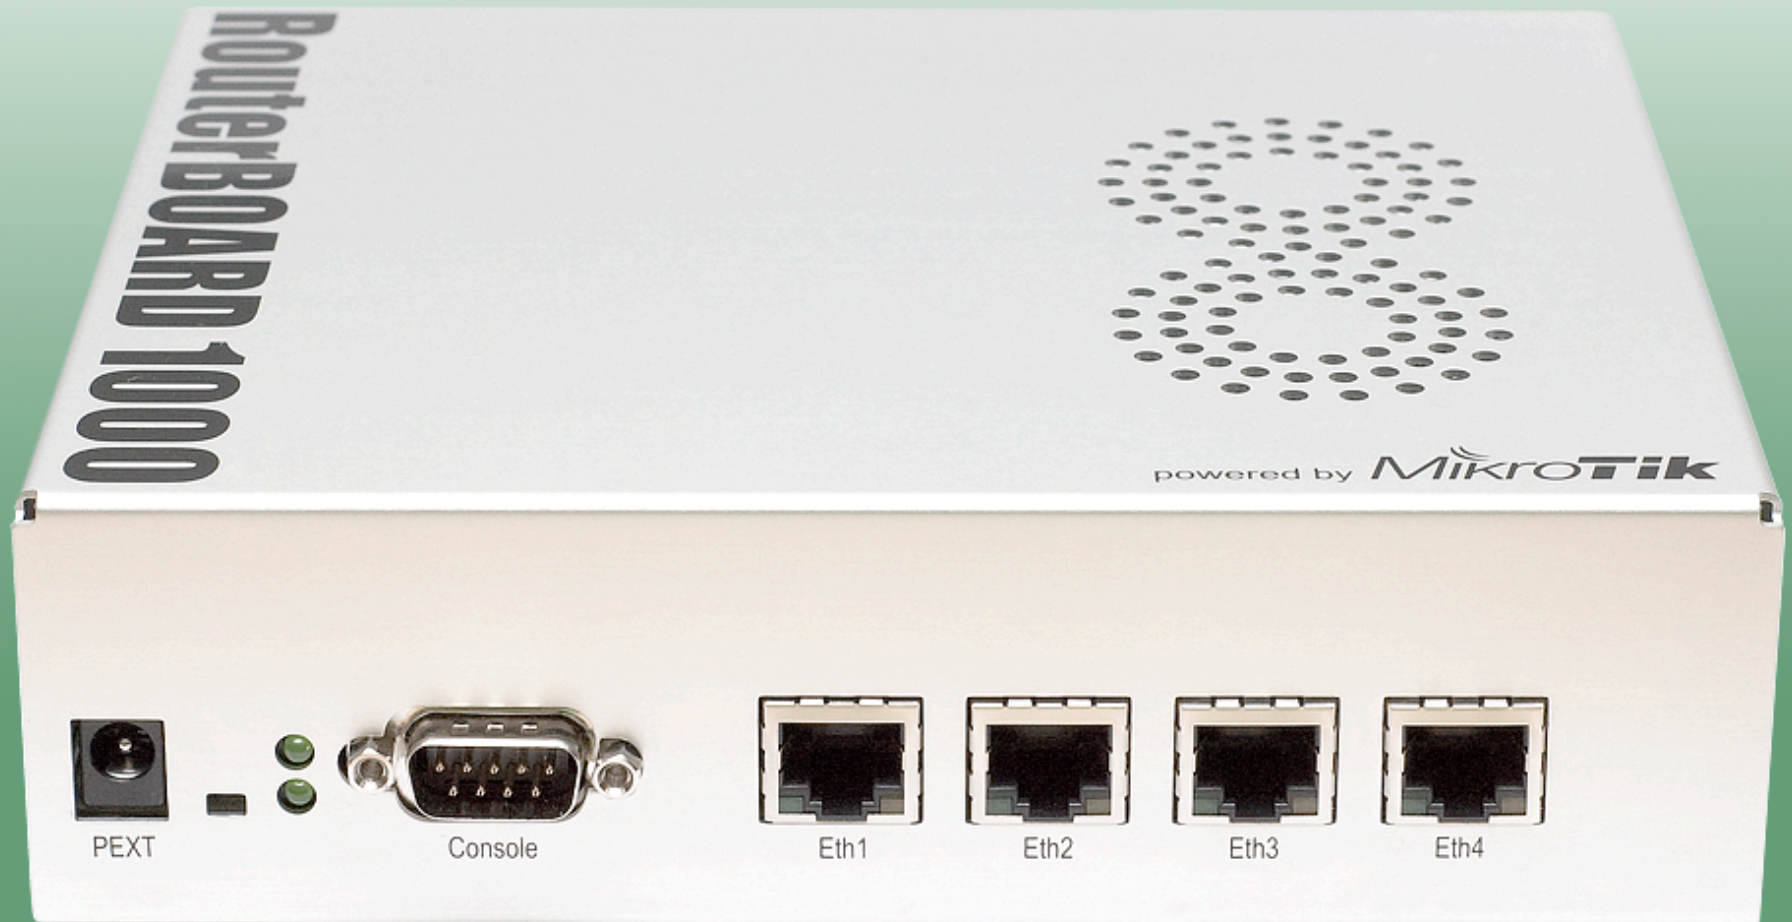

RB1000

- Backbone router
- VPN / PPTP / PPPoE server
- PowerPC Network processor **1.3Ghz**
- 4x Gigabit Ethernet ports
- 2x CF/Microdrive slots
- Up to 3200Mbps throughput

RB1000

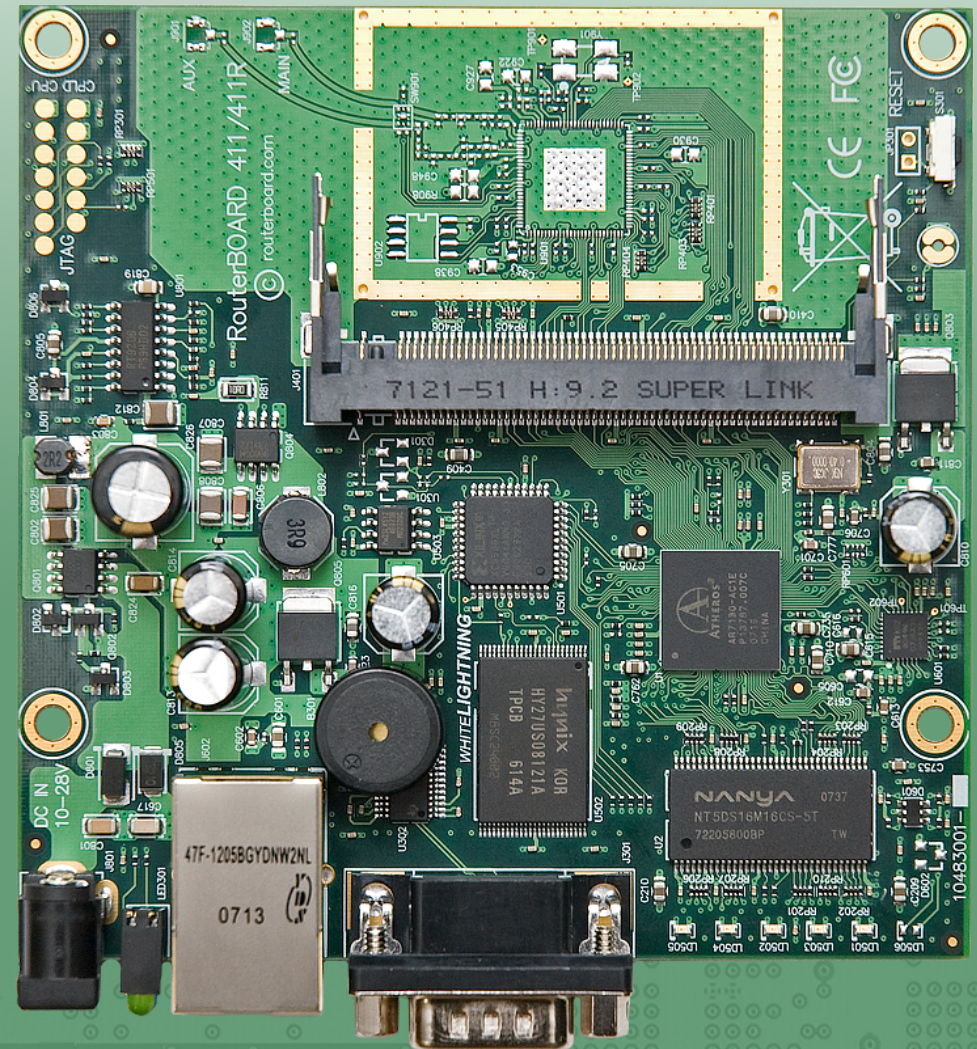

RB1000 rackmountable

- Special version of RB1000
- Pre-built all in one solution

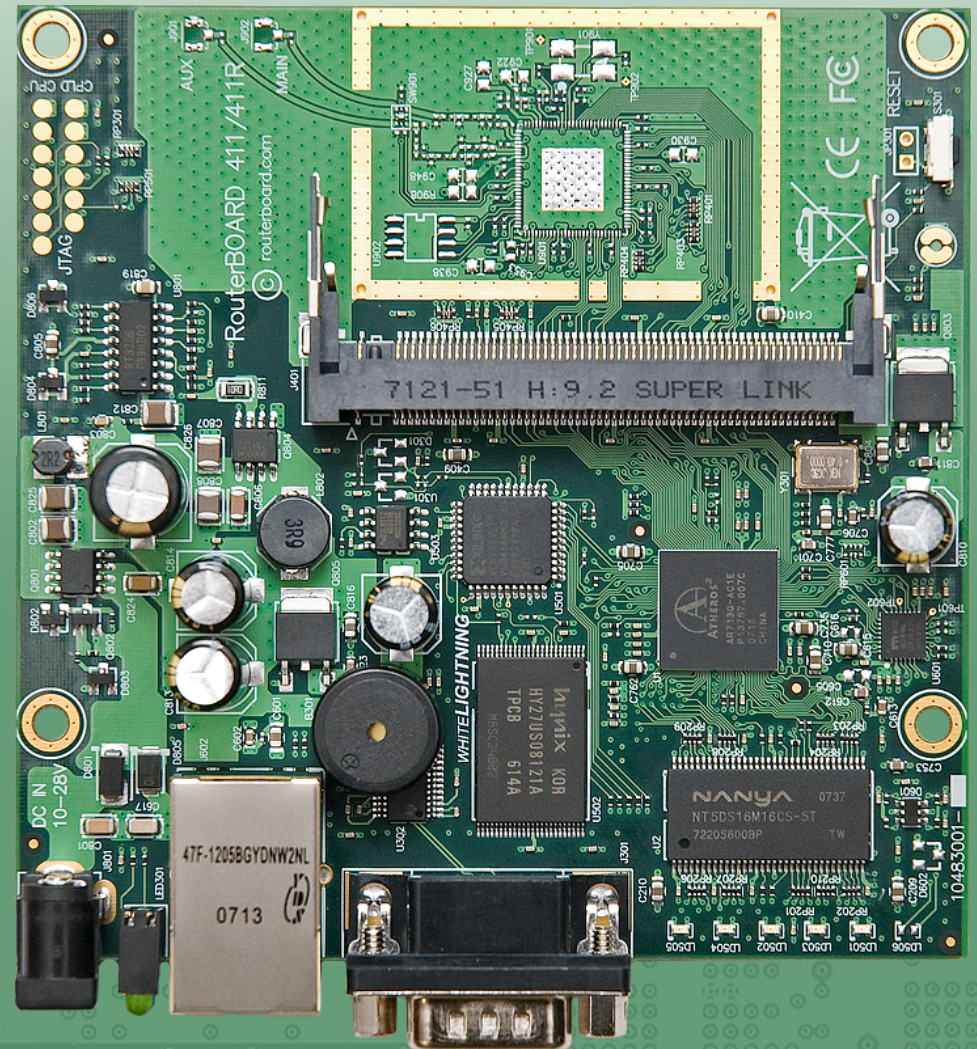

RB411

- Small format CPE
- Replaces RB133c
- Atheros AR7130
300MHz network
processor
- One miniPCI and
one Ethernet
- 32Mb RAM
- Only **59\$**

RB411a

- Same as RB411
- 64Mb RAM
- Level4 license
- US \$79

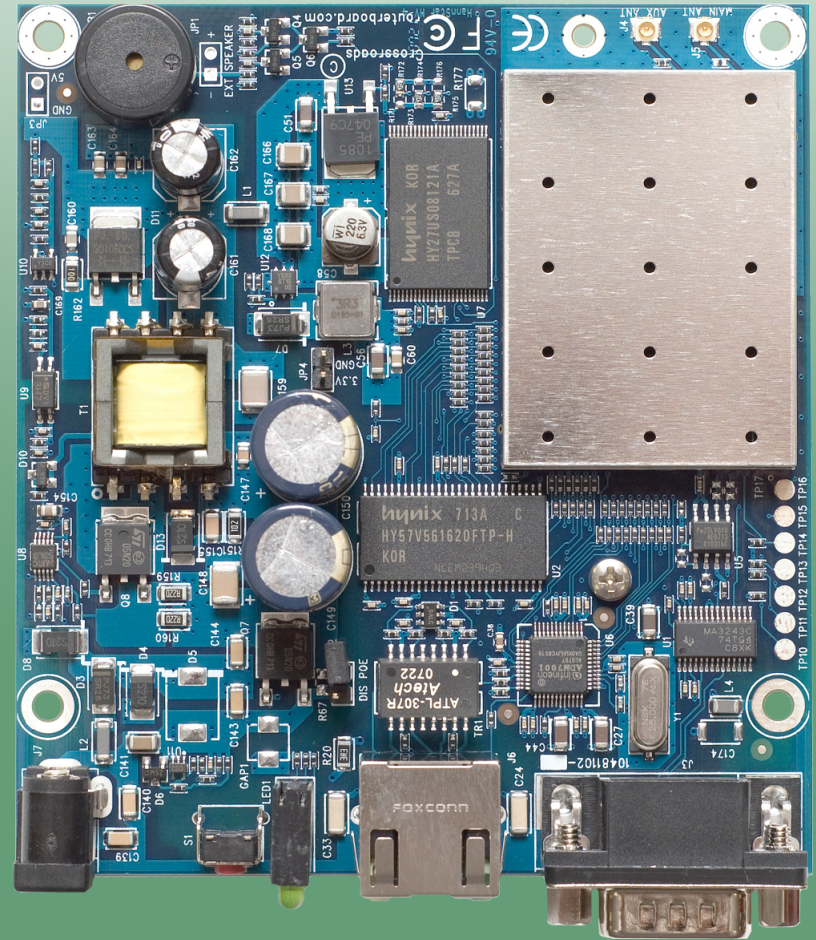

RB433

- Small format AP
- Replaces RB133
- Atheros AR7130
300MHz network
processor
- 3 miniPCI and 3
Ethernet
- Only **99\$**

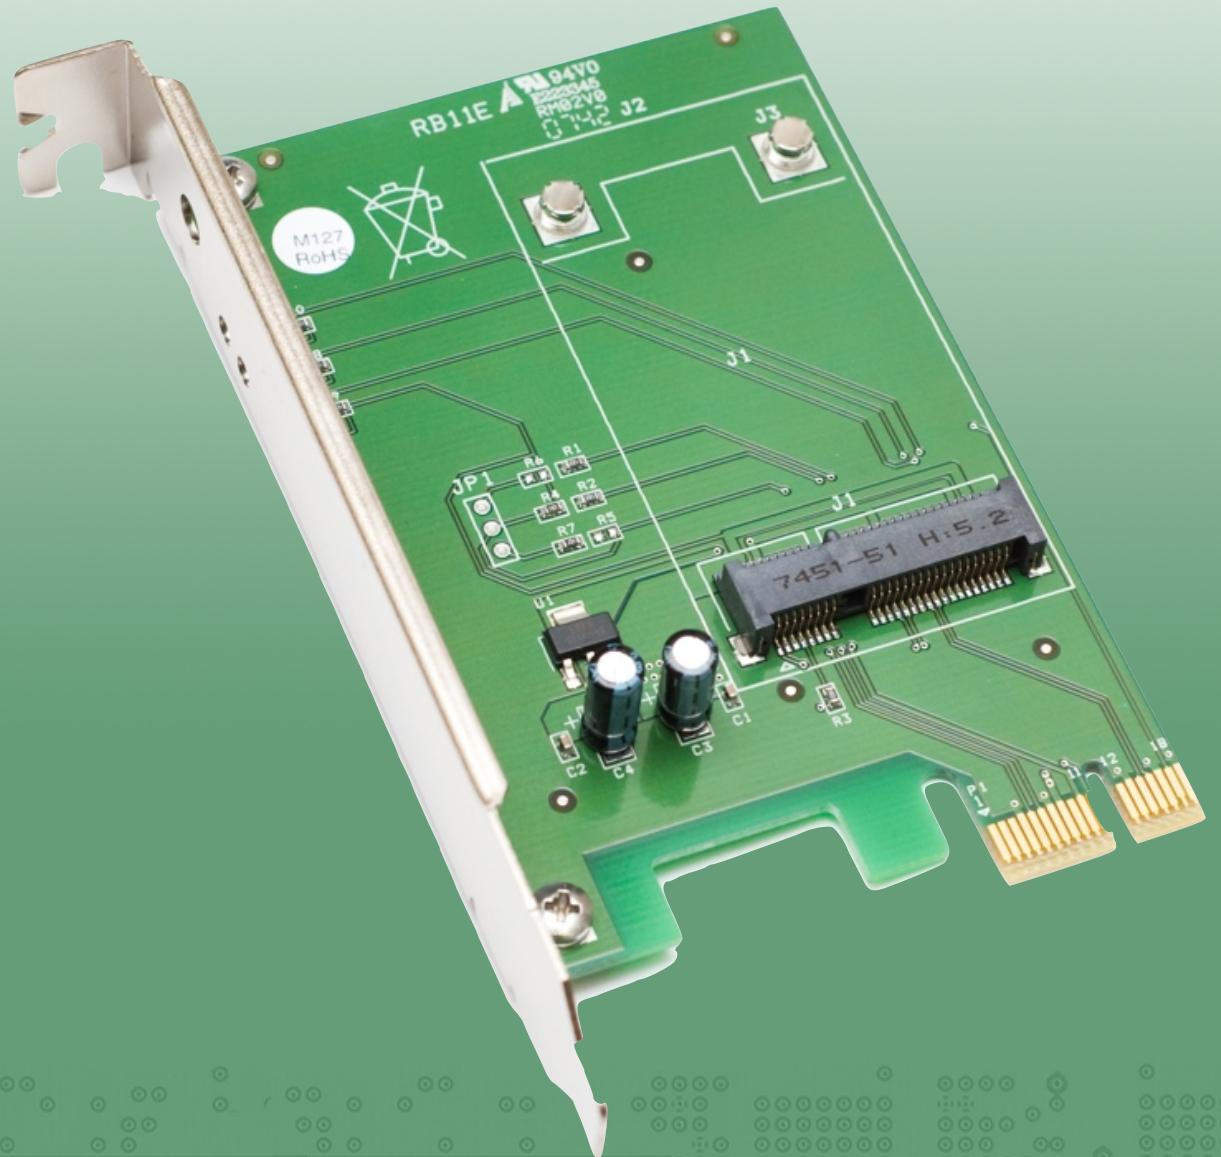

Crossroads

- Integrated 2.4GHz wireless
- High power - 26dB
- Smallest CPE yet!
- Low cost: 119\$
- MIPS32 4KEc based 184MHz CPU
- FCC certified

RB11e

- PCIe mini to PCIe adapter
- Allows easy transition to new standard
- Use for new Wireless cards

More Planned Products

- **RB400** other devices in this series
- **RB800** series:
 - Very High Speed Gigabit AP Base Station
 - Daughterboard compatible with RB500/600
 - **MiniPCI express** interfaces
 - MiniPCI interfaces
- RouterBOARD with USB port
