DNS at address-list

- Add DNS name to address-list, router will find addresses automatically
- Set appropriate rules at firewall

The screenshot shows the Mikrotik WinBox Firewall configuration interface. The 'Address Lists' tab is active, displaying a list of address lists. A dialog box titled 'Firewall Address List <filter_youtube>' is open, showing the configuration for a new address list named 'filter_youtube' with the address 'youtube.com'. The status 'enabled' is shown at the bottom of the dialog.
