**The Solution &  
Technical Support  
Providers & Authorized  
Distributors  
MikroTik Radio Devices.**

**MikroTik Is the world's largest Long Range Point-to-Point & Point-to-Multipoint Wireless Radio (Onboard Mini-PCI Boards) and Onboard LAN cards Manufacturers Using Their Powerful MikroTik RouterOS Software.**

**Point-to-Point &  
Point-to-Multipoint**

**Wireless Data Communication  
Solutions Providers**

**Distributors for India for the most cost-effective fully Assembled, preconfigured and sealed MikroTik and Mini-MikroTik Radio Devices. Part of these device components are made, put together and sealed in India in their Hyderabad facilities. One of the biggest global exporters of MikroTik devices and components. Significantly, all the devices are of "License Free Dual Band" 2.4~5.8Ghz frequency.**

# The Wireless Advantages

- \* **Wireless media is used for LAN,MAN and limited WAN**
- \* **Wireless will provide the following features.**
- \* **Reliability**
- \* **Flexible**
- \* **Scalable**
- \* **Secure (128 WEP encryption)**
- \* **No right of way issues**
- \* **Cost Effective**
- \* **Easy manageability( Customer own network)**

## Who Use Mikrotik?

- Those Who Need To Distribute Internet Connectivity Wireless
- Those Who Need To Distribute Internet Connectivity in Remote Locations and or Rural Areas.
- Where Laying of Cables and Wires are proving to be expensive and need more robust and cost-effective solution to connect different sites / locations.

**ISPs Use MikroTik Radio Devices To Offer Internet Connectivity To Their sub-ISPs and end-users**

## The Potential Markets

- ISPs – Internet Solution Providers.
- Bandwidth Resellers
- Multi-location Establishments Who Need To Different Locations and Share Data.
- Hotels – Who Need WiFi Connectivity For Their Clients – With HotSpot Solution – With or Without Billing Feature.
- Campus WiFi – Educational Institutions.

## **Why Mikrotik?**

- Most Cost-effective solution
- High-speed wireless data links (Up to 108Mbps)
- Connection distance up to 70 km without repeater sites.
- IP - NAT, Routing, DHCP
- Security - Firewall, Secure Tunnels
- Control - Queues, Proxy, Accounting, Hotspot – All in One
- Fast and simple installation for base station and clients
- Reliable and instant 24 hour internet access

**ISPs Use MikroTik Radio Devices To Offer Internet Connectivity To Their sub-ISPs and end-users**

## **Long-Range Wireless Connectivity Applications & Solutions**

High-speed wireless systems are used to provide internet access to end-users using point-to-point or point-to-multipoint architecture.

Wireless data links take place where there is no infrastructure for internet access or in places where bandwidth offered by current channels is too low. Being most cost-effective, many with location interests also opt for MikroTik offered wireless connectivity solutions.

You could get the most cost-effective Long Distance Very High Bandwidth solutions with MikroTik-WISP India wireless equipments.

Our equipments are features rich such as : Firewall, NAT, VPN, Bandwidth Management, QoS and many more. These just to name a few.

# HotSpot Solution

## Hotspot Features

- \* DHCP Server For Assigning IP Addresses
- \* Hotspot Welcome / Login Page
- \* Authentication And Accounting Locally, Or \*
- Using Any RADIUS Server Accounting By Traffic, Time
- \* Special MikroTik User Manager

## Application

Typical applications include wireless access in Airports, Hotels, Hostels, Schools, Colleges, Universities, **Public Transportation Hubs (Airports, Road Transport & Railway Stations)**, and other public places, as well as authenticated access to network resources in universities and schools. This is the most ideal for Paid Access to Authorized Users.

## HotSpot can be used with:

- MikroTik's™ AP implementation
- A standalone AP connected by Ethernet
- Regular Ethernet clients

Hotspot Solution is built based on existing MikroTik RouterOS™ platform as additional feature. Can be used with all existing features.

MikroTik RouterOS™ V2.9 Hotspot Solution enables “**User Authentication**” and “**Accounting (Billing)**” in “*public*” or “*private*”, “*wired*” or “*wireless*” networks.

**Many Star Hotels Use HotSpot Billing Feature To Provide Paid Internet Access To Their Room Guests. Schools, Colleges and Universities use HotSpot Billing Solution to extend Paid Internet Access to their Hostel Inmates, Students.**
