

MUM SAUDI ARABIA

RIYADH, OCTOBER 22, 2017

Future Legend Est for Trading established in December 2006.

Started using MikroTik Products in 2007, Hotspot server in x86 systems
, Firewall in x86 systems and wireless P2P.

Some Of Our Work

1- Supply and Install DSLAM's (ADSL and VDSL)

2- Wireless Links for ISP's, Companies, PtP and PtMP.

3-CCTVs.

4-IP-PBX.

5-Passive Network.

6-MATV systems.

Our First Project Installing Wireless PtMP for ISP above alFaysalyah
Tower Powers By MikroTik OS

Connecting over than 40 locations over
Wireless Using MikroTik Router Board
and Custom made Antennas

MikroTik Router Os

RouterOS is the operating system of RouterBOARD

It can also be installed on a PC and will turn it into a router with all the necessary features - routing, firewall, bandwidth management, wireless access point, backhaul link, hotspot gateway, VPN server and more.

Challenging Project and how MikroTik Helped

1- Providing the internet with a high speed to this location.

Nearest location 12Km speed request 45mpbs

2-distributing the internet to the residential users over cable and controlling the speed.

3-Connecting remote sites over VPN for accessing the IPPBX and Accounting program.

Solution

Wireless Link Using MikroTik RBLHG-5nD

on: 10.20.0.36

Uptime: 71d 06:26:26 Time: 01:
